EDUCATION

- Saraswati College Of Engineering** Navi Mumbai, India
Bachelor of Engineering- Information Technology; CGPA: 9.11
Courses: Operating Systems, Data Structures, Artificial Intelligence, Machine Learning, Networking, Database Management System
July 2021 - May 2025

SKILLS SUMMARY

- Languages:** Core Java, Python, JavaScript
- Frameworks:** Selenium, React, Next.js, Typescript, Bootstrap
- Tools:** GIT, GitHub, Visual Studio, Eclipse
- Databases:** MySQL, Django, MongoDB
- Soft Skills:** Leadership, Time Management, Problem Solving

EXPERIENCE

- Cognizant Technology Solutions** Bengaluru - Onsite
Software Tester (Full-time)
Present
 - Functional & Automation Testing:** Performed manual and automation testing using Selenium, TestNG, and BDD.
 - API Testing:** Conducted API testing with Postman and REST Assured to validate request-response accuracy.
 - CI/CD:** Worked with Jenkins and Docker for continuous integration, automated builds.
- Talents2Germany** Germany - Remote
Frontend Developer (Intern)
April 2024 - August 2024
 - Dynamic Web Pages:** Candidate and Admin pages using Next.js, Typescript, Tailwind CSS and Laravel.
 - Stripe Integration:** Using Stripe webhooks to store candidate's transaction details automatically in database.
 - Clickup Form Integration:** Implemented form integration with ClickUp using ClickUp Webhooks.
- Ural Federal University** Russia - Onsite
Full Stack Developer (Intern)
July 2024
 - Frontend:** Developed the frontend using Next.js and TypeScript.
 - 3D Model Creation:** Created 3D models using Blender.
 - 3D Model Display:** Displayed 3D models on the website using Three.js and used Google's Model Viewer for AR mode display.

PROJECTS

- SAHAYAK (A Prototype on Microgreens):**
Features: Efficient cooling mechanism, innovative clay plate design, IoT integration, energy and cost efficiency, scalability and sustainability and environmentally friendly. Tech: C++.
- Vision2Furniture (An AI Furniture Recommendation Web Application):** [🔗](#)
Features: Text to Image Model, Image to Image Model, 3D models visualization in AR mode and Language Translation. Tech: Next.js, Typescript, Three.js, Deep Learning, Blender.
- LocalLink (An Application for Solving Social Issues in Cities):** [🔗](#)
Features: Location Tracking, 360° view of Map, Upvote, Community Forums, Join Events. Tech: HTML, CSS, JavaScript.
- Moonquake Map 2.0 (3D Moon and Moonquake Visualization Web App):** [🔗](#)
Features: Fully rotatable 3D Moon Globe, moonquake locations, seas and oceans on the moon, Apollo landers locations, and a heat map of the moon. Tech: HTML, CSS, Three.js.
- Satellites Around Globe (A Web App to Visualize Satellites Around Earth):** [🔗](#)
Features: Displays about 16,000 satellites orbiting Earth, satellite names and countries, orbit animation, and country-based filters. Tech: HTML, CSS, Three.js, Tween.js.

CERTIFICATIONS

- Python Programming:** Spoken Tutorial Project at IIT Bombay.
- Amazon Web Services For Beginners:** Great Learning

HONORS AND AWARDS

- Won award for best student project at CSI 2024.
- Selected for the URFU Summer Internship in Ekaterinburg, Russia.
- Won College Hackathon.
- Qualified for NASA Space Apps Challenge 2023 Hackathon at the national level.
- Achieved top ranking in both Semester 4 and Semester 5.
